

## Zedira communication

### Zedira supports 2nd Gordon Conference on “Transglutaminases In Human Disease Processes” (July 15-20, 2012)

---

Zedira is very proud to support again the Gordon Conference dedicated to Transglutaminase. The conference will be held **July 15-20, 2012** at Davidson College in Davidson, North Carolina, USA.

The 2012 Gordon Conference on "Transglutaminases in Human Disease Processes" is the second Gordon Conference to focus on this rapidly expanding field. The meeting will cover cutting-edge research on the biology of transglutaminases and the role of this family of enzymes in disease processes.

Please follow the [link](#) for details.

### Attached is the announcement by Kapil Mehta, Ph.D., Conference Chair and Mauro Piacentini, M.D., Co-Chair

---

Dear Friends:

We are pleased to announce the 2nd Gordon Research Conference on “Transglutaminases in Human Disease Processes” to be held from July 15-20, 2012 at Davidson College, North Carolina. Approval by the prestigious GRC Review Board to hold 2nd meeting is a strong testimony of ‘a very successful’ first meeting chaired by Dr. Richard Eckert. We wish to thank Dr. Eckert and Ms Kathleen Reinecke for organizing such a GREAT meeting and look forward to their continued support.

Our meeting is still on probation, which means that in order to hold the next and 3rd meeting (during July 2014 that will be chaired By Dr. Mauro Piacentini), we must bring at least 150 Investigators to attend 2012 meeting. In order to include this meeting on regular list of the GRC meetings, we need your help. Please forward this announcement to other interested/new investigators and encourage them to register and attend the 2012 meeting. Also, please mark your calendar and plan to bring as many trainees/students from your

laboratory as possible. We are trying to raise funds to waive in part the registration fee of as many young investigators as possible.

Major goal of this meeting is to bring together an international group of academic and corporate scientists working on various aspects of transglutaminases in health and disease. The meeting is designed to exchange new information, promote new collaborations, and to enhance interaction among new, just entering and established investigators.

Thanks for your assistance. We look forward to seeing you again in July, 2012.

**Kapil Mehta, Ph.D., Conference Chair**  
**Department of Experimental Therapeutics – Unit 362**  
**University of Texas M. D. Anderson Cancer Center**

Please notice that [Zedira](http://www.zedira.com) offers the full range of products for transglutaminase and celiac disease research. For detailed information concerning our products please refer to our web site ([www.zedira.com](http://www.zedira.com)).

Should you have any questions or queries about our products, please do not hesitate to contact us: [contact@zedira.com](mailto:contact@zedira.com)

We are continuously enlarging our product portfolio in order to fulfill researcher's requirements in the field of transglutaminase R&D. For special requirements please contact us: [contact@zedira.com](mailto:contact@zedira.com).
